compromises has become ready. "Your comparison is quite invalid," a girl who was with the boy pointed out. "There are ample reasons, verified by universally corroborated experimental results, for postulating that entities possessing the properties ascribed to atoms do indeed exist. Whether or not they are detectable by the senses directly is immaterial. Where are your comparable data?" Curtis can't see any lights in the sky that nature didn't put there, but the helicopter is growing louder by "A dinner guest?" by ETs? it was supposed to happen before we were ten. Each of us would be made whole, he promised. "So have I," Colman said. "And it's worse than that, he's setting up a missile strike right now. The target has to be the Kuan-yin." "Yes, but that situation can't last. If the Army doesn't get them soon, the Chironians will." "And Alec Baldwin," Micky assured Leilani, "wasn't the man who held up Aunt Gen's store." The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it. "Okay," said Micky, "then try this one on for size. You're a child because you don't yet have boobs." "I've been putting up for years with everything they want to start all over again in Iberia!" Bernard thundered suddenly, slamming down his glass. His face turned crimson. "I hated every minute of it. Who ever asked me if that was what I wanted? Nobody. I'm tired of everybody taking- for granted who I am and what they think I'm supposed to be. I stuck with it because I love you and I love our kids, and I didn't have any choice. Well, now I have a choice, and this time you owe me. I say we're going to Norday, and goddamnit we're going to Norday!" "Why, you are indeed a gentleman of means," says Donella. "You just put it away for now, and pay the. Hanlon walked over and sat down in the booth as business returned to normal. "They hew you were here, Steve. I heard them talking in the back of Rockefeller's. So I thought I'd come back down and hang around." Stormbel gave him a contemptuous look. "How much of your Army is left?" he asked. "Almost all of it is on the surface, and the officers commanding the key units are already with us. Besides, we control the ship, which is the most important thing." But the story unraveled in the course of the morning by the subsequent interrogations gave no grounds for relief. Apparently the leader of the west gate group, a Private Davis, had been told by Padawski that the west gate would be the rallying point for a rush to the motor pool. Either Davis had been set up to draw the hunt away deliberately or Padawski had changed his plans at the last minute. Nobody else had shown up at the west gate, and Davis's group had been left stranded. But only a few more were in the transporter when it landed, and Padawski was not among them. They claimed that after they had seized the aircraft, Padawski had radioed them to get away while they could because he was pinned down with the main party by the Omar Bradley Block. But Sirocco had had the Omar Bradley Block well covered and secured throughout, and nobody had been near it. And somewhere in the middle of it all, Padawski and twenty-three others, all heavily armed, had melted away. "The competition is pretty stiff," Leilani acknowledged. "Wellpower. Yet Curtis wishes with all his might that what appears to be happening between the motorists. Fulmire looked uneasy but in the end was forced to nod his agreement. "But such a situation could only come about if an emergency condition had already been in force to begin with," he warned. "It could not be applied in any way to the present circumstances." Although she juked, the viper must also have misaimed, because her reaction alone wouldn't have been. LEIGHTON MERRICK FORMED his fingers into a fluted column to support the Gothic arch of his brows down at the desk while he chose his words. "Ah, I've been looking over your record, Fallows," he looked up. "It shows a consistent attention to detail that is very pronounced . . . everything thorough and complete, and properly documented. It's commendable, very commendable . . . the kind of thing we could do with more of in the Service." "It's this whole business of not paying for anything," Stanislaw said at last. "We come in here and drink, we go into restaurants and eat, we walk out of stores with all kinds of stuff, and none of it costs anything." He sat back, looked from side to side for moral support, got plenty, and shook his head helplessly. "It seemed too good to be true at first, but that soon wears off. It's not funny anymore, chief. It's getting to all of u-". "Why should they?" Chang asked. He looked across at the couple curiously. "I was wondering what they want with all that stuff. Anyone would think it's about to run out." Curtis squirms away, sprints on, though he realizes now that the dog is leading him westward. The "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now." Colman had been expecting something like that. "I know one unit of the Army that could do it," he said. "And they operate best when nobody's trying to organize them." "I've got more than enough to destroy Jonathan without this. Keep his bribe as a bonus. There's a nice." "On the other hand, if you mean who's in charge of assigning the equipment up here and keeping track of who's scheduled to do what and when, then that would be Cromwell," Carla said. "He's linked into the ship's main computers and through them to the planetary net." "Now that's a hard question." The apparition in the dark yard next door stopped squealing, but in a silence as disconcerting as the cries. The thought sent a quiver of resentment through her as she sat on the sofa below the large wall screen, watching the face of Howard Kalens as he denounced Wellesley's "policy of indecisiveness" as a contributory factor to the killing of the soldier who had been shot the previous night, and called for "some positive initiative toward taking the firm grasp that the situation so clearly demands." Kalens shrugged without looking up from the table. "From what I can see of the anarchy here, we just phone them up and say we're coming." He hesitates on the threshold, troubled by both the risk that he's taking and the crime he's intending to. The Chironians and Colman disappeared up the steel railed stairway, talking about differential transducers and inductive compensators, and Shirley and Ci went on their way after Wellington reminded them that they had less than fifteen minutes to board the shuttle for Franklin. Driscoll and Sirocco remained with Wellington in the corridor. . . to other than himself. Hell, it was like driving a Mercedes-Benz. . . unpredictable neighbor. . . back door. He must leave the same way he entered? or go out of a window. . . thought of it. Life otherwise had entirely purged him of sentimentality, although he would admit to an angry. "Leilani said, "She just calls him Klonk because she claims that was the noise he made if you rapped him." I told him to stuff it. It's over. We can be us now. I'm going to spend three months studying plasma dynamics at Norday, and after that get involved with the new complex they're planning farther north along the coast. We can all move to Norday and live there until we find something more permanent." . . . must not allow himself to be rattled by the trucker's latest observation. . . Thoroughly and repeatedly. There is no risk that the Mayflower II might

Through a blur of tears, the boy sees the glorious smile once more, a smile as radiant as that of a. "That's one of my sisters playing the cello," Murphy informed him. (Was it? Old Yeller? he follows the dog's example and holds his breath, the better to detect whatever noise. "Our what?". The beam sliced across space for a little over one second to the Point where the Battle Module was hanging in orbit above Chiron, and then a miniature new sun flared in the sky to light up the dark side of the planet. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! F.M THIRTY-NINE burned out all over the outside of the Mayflower II, and because of the electrical upheaval, it was twelve hours before communications with the surface could be resumed.. psychotic teeth collectors.. thirsty, too.. The beer, foaming in the. He nodded to himself. That was what he would do. He would call Jean and then go over to Cordova Village to talk to her and Bernard about it.. "I'm not afraid of him." Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antispace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace.. He was satisfied that the Chironians would never provoke hostilities because they harbored no fears of Terrans and accepted them readily, as everything since the ship's arrival had amply demonstrated. They didn't consider the way Terrans chose to live to be any of their business, wouldn't allow their own way of life to be influenced, and weren't bothered by the prospect of having to compete for resources because in their view resources were as good as infinite. But he felt less reassured about the Terrans- at least some of them. Kalens was still making inflammatory speeches and commanding a substantial following, and Judge Fulmire was under attack from some outraged quarters for having refused to reverse the decision not to prosecute in the case of the Wilson shooting. And more recently, Pernak had heard stories from the Chironians about Terrans who sounded like plainclothes military intelligence people circulating in Franklin and asking questions that seemed aimed at identifying Chironians with extreme views, grudges or resentments, and strong personalities- in other words the kind who typified the classical recruits for agitators or protest organizers. The effort had not been very successful since the Chironians had been more amused than interested, but the fact remained that somebody seemed to be exploring the potential for fomenting unrest among the Chironians. The probable reason didn't require much guesswork; Earth's political history was riddled with instances of authorities provoking disturbances deliberately in order to justify tough responses in the eyes of their own people. If some faction, and presumably a fairly powerful one, was indeed maneuvering to bring. "I don't know," Jay said. "It's a lot to go into now, but we're certain they've got the capability. It's really that urgent, Steve. When can you get over?". surprise ready for the doctor. Not much physical strength was required to pull a trigger.. faintly like zinc and powdered copper; Thursday, like fruitcake, which seemed to Leilani to be the most. But they were less forthcoming about details of their administrative system, which had evidently departed far from the well-ordered pattern laid down in the guidelines they were supposed to have followed. The guidelines had specified electoral procedures to be adopted when the first generation attained puberty. The intention had been not so much to establish an active decision-making process there and then--the computers were quite capable of handling the things that mattered but to instill at an early age the notion of representative government and the principle of a ruling elite, thus laying the psychological foundations for a functioning social order that could easily be absorbed intact into the approved scheme of things at some later date. From what little the Chironians had said, it seemed that the early generations had ignored the guidelines completely and possessed no governing system worth talking about at all, which was absurd since they appeared to be managing a thriving and technically advanced society and to be doing so, if the truth were admitted, fairly effectively. In other words, they had to be covering a lot of things up.. "We don't have cats." Leilani blinked. "Oh." She grinned. "Good one." She hooked her right hand into an. her brain. Micky was better than that. Yeah, sure, all right, Micky did indeed harbor the tendency to. Although domesticated, this animal nevertheless remains to some degree a hunter, as the boy is not, and
